

etamax space is a technology oriented and growing company. We provide software engineering and quality assurance services for safety- and business-relevant software and systems. Our national and international customers are manufacturers in aeronautical and aerospace engineering, transportation technology and the automotive industry.

In order to expand our teams we are currently hiring for our locations in **Braunschweig** or **Bremen**.

Software Developer (Aerospace) (m/f) (Ref 23-163)

Your Tasks

- Support the generation of the software architecture
- Implementation of the on-board software based on complex software requirements
- Development, execution and maintenance of module and integration tests
- Analysis and correction of software problems
- Creation and maintenance of software documentation throughout the complete software lifecycle

Your Profile

- BS or MS Degree in Computer Science, Electronic Engineering or equivalent field
- Very good knowledge of embedded software development with C
- Good knowledge of object-oriented software development (i.e. C++, Java or comparable)
- Autonomous, structure-oriented way of working with strong communication and organizational skills
- Very good level of English in both spoken and written

Advantage factors:

- Several years of working experience as a software developer
- Knowledge of aviation and aerospace software development standards and norms (i.e. ECSS-E-ST-40, DO-178C)
- Experience with other scripting and programming languages (i.e. Python)
- Practical experience with continuous integration and versioning control tools, build scripts, software testing and real-time operating systems (i.e. RTEMS)
- Knowledge of different software development processes (i.e. V-Modell, Agile)
- Willingness to travel

We offer

- Opportunity to take part in interesting projects across the European aerospace domain
- Flexibility and individual career development opportunities
- Integration in an highly motivated international team
- Qualification and performance-oriented salary
