Software Tester (Aerospace) **Mit Sicherheit**

(m/f) (Ref 23-164)

zu
UNS

Your Tasks

- Verification of requirements from complex space systems
- Test case specification based on the applicable requirements
- Implementation, automation and maintenance of functional software tests
- Execution of software tests along with the evaluation, analysis and documentations of test results
- Creation of metrics and reporting using project relevant verification tools
- Software problem tracking towards the successful retest
- Continuous development of the test environment including tools and simulation

Your Profile

- BS or MS Degree in Computer Science, Electronic Engineering or equivalent field
- Practical experience with structured software testing
- Good analytical skills allowing understanding of complex systems
- Experience in at least one relevant scripting and programming language (i.e. C, Python, Tcl/Tk)
- Autonomous, structure-oriented way of working with strong communication and organizational skills
- Very good level of English in both spoken and written

Advantage factors:

- Several years of working experience as a Software Tester
- Knowledge of Aviation and Aerospace Standards and Norms (i.e. ECSS-E-ST-40, DO-178C)
- Practical experience with test automation, versioning control tools and build scripts
- Willingness to travel

We offer

- Opportunity to take part in interesting projects across the European aerospace domain
- Flexibility and individual career development opportunities
- Integration in an highly motivated international team
- Qualification and performance-oriented salary
